New Application

* Denotes subcategories where recipients must identify the amount of total funds that are allocated to Evidence-Based Interventions.

^ Denotes subcategories where recipients must report on whether projects are primarily serving disadvantaged communities. See Project Demographic Distribution

For details on acceptable types of capital expenditure see Types of Capital Expenditure

Project Name *

Project Description (Max 1,500 characters) *

Infrastructure - Broadband

Subcategory: *

Requested ARPA Share: *

Location (Geospatial location) IB *

Technology to be deployed: *

Expected Speeds/Pricing Tiers to be offered: *

Miles of fiber: *

Cost per mile: *

Other Revenue Sources (Amount): *

Cost per passing: *

Total Project Cost: *

Description of type of Other Revenue Sources: *

Focuses on the unserved or underserved households and businesses: *
◉ No ○ Yes

Estimated Project Start Date: *
M/D/YYYY

Does the project prioritize local hires?
◉ No ○ Yes

Estimated Project Completion/Operations Date: *
M/D/YYYY

Meets or exceeds symmetrical upload and download speeds of 100 Mbps: *
◉ No ○ Yes

Date of Town Meeting or City Council Approval:
M/D/YYYY

Does the project have a Community Benefit Agreement?

(•) No ( ) Yes

If project is not designed to reliably meet or exceed symmetrical 100 Mbps download and upload speeds, explain why not here:

If the project has a Community Benefit Agreement, provide a description of it here:

Project is designed to, upon completion, meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed, and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed. *

(•) No ( ) Yes

Number of households on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of households on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of households on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of households on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of households on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of households on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of businesses on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of businesses on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of businesses on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of businesses on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of businesses on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of businesses on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of small businesses on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of small businesses on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of small businesses on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of small businesses on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of small businesses on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of small businesses on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of elementary schools on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of elementary schools on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of elementary schools on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of elementary schools on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of elementary schools on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of elementary schools on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of secondary schools on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of secondary schools on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of secondary schools on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of secondary schools on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of secondary schools on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of secondary schools on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of higher education institutions on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of higher education institutions on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of higher education institutions on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of higher education institutions on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of higher education institutions on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of higher education institutions on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of libraries on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of libraries on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of libraries on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of libraries on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of libraries on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of libraries on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of healthcare facilities on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of healthcare facilities on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of healthcare facilities on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of public safety organizations on tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of public safety organizations on tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of public safety organizations on tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of healthcare facilities on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of healthcare facilities on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of healthcare facilities on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

Number of public safety organizations on non-tribal lands projected to have increased access to broadband meeting the minimum speed standards in areas that previously lacked access to service of at least 25 Mbps download and 3 Mbps upload:

Number of public safety organizations on non-tribal lands with access to minimum speed standard of reliable 100 Mbps symmetrical upload and download:

Number of public safety organizations on non-tribal lands with access to minimum speed standard of reliable 100 Mbps download and 20 Mbps upload:

For the relevant project, all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing, as determined by the U.S. Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act", see link below for certification requirements), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the State (or the District of Columbia) in which the work is to be performed, or by the appropriate State entity pursuant to a corollary State prevailing-wage-in-construction law (commonly known as "baby Davis-Bacon Acts")

(●) No ( ) Yes

For projects over $10 million, certify the project includes a project labor agreement (PLA), meaning a pre-hire CBA consistent with section 8(f) of the National Labor Relations Act (29 U.S.C. 158(f)). If this certification is not made, please provide/attach a project workforce continuity plan, detailing: How the recipient will ensure the project has ready access to a sufficient supply of skilled and unskilled labor to ensure high-quality construction throughout the project; How the recipient will minimize risks of labor disruptions that would jeopardize timeliness and cost-effectiveness of the project; How the recipient will provide a safe and healthy workplace that avoids delays and costs associated with workplace illnesses, injuries, and fatalities; Whether workers on the project will receive wages and benefits that will secure an appropriately skilled workforce in the context of the local or regional labor market; and whether the project has completed a PLA.
